Risk Disclosure & Warning

*This notice highlights the principal risks of trading leveraged CFDs with Elefin. Clients should read it carefully and seek independent advice if needed.*

CFDs are complex leveraged instruments and carry a high risk of losing money rapidly; you may lose all of your invested capital. Trading is not suitable for everyone.

Leverage (up to 1:2000) magnifies both gains and losses; small market movements can have a large effect on your account.

Prices are volatile; news, economic events and liquidity conditions can cause sharp moves, gapping and slippage, so orders (including stop-losses) may execute at different prices than requested.

If margin falls below required levels, positions may be closed automatically (stop-out at 30%) without notice.

Online trading depends on hardware, software and connectivity that may fail or be delayed; execution at a requested price is not guaranteed.

Elefin does not provide personal investment, tax or legal advice; any information provided is general. Past performance is not indicative of future results, and you are responsible for the taxes applicable to you.
